## Aluminum Clad - A New Finishing Option

Aluminum Clad is a pre-painted finishing solution for jambs and brickmould which adds an attractive, clean look to your overall door unit. Designed from an affordable aluminum coil stock, Aluminum Clad is formed into a covering with highly defined moulding details and a textured, easy-to-clean surface.

### Designed For Success

#### 1. HIGHLY DEFINED MOULDING

The bending of the coil stock follows the contours and definitions of the jambs and brickmould resulting in defined details that last.

#### 2. STORM DOOR READY

Every unit with a sidelite is constructed with a FrameSaver® Storm Door Ready Mullpost.

#### 3. WEATHER SEALED

Tubes of color-matched and clear caulk are provided with your installation kit to seal edges from moisture and create a unit with a complete, finished look.

#### 4. TEXTURED SURFACE

The easy-to-clean surface of the cladding has an appealing pre-painted texture that requires no refinishing while maintaining its vibrant color.

#### 5. CLEAN EDGES

Each piece is machine cut resulting in a pleasing clean look to the edge of the clad.

Engineered To Last

#### MOISTURE MANAGEMENT

The system was designed with the clad pieces overlapping, preventing moisture from accumulating beneath the cladding.

#### SECURE FIT

The sides of the brickmould covers are angled for a tight fit while the edges are hemmed, or bent over themselves, to provide rigidity.

#### ROT RESISTANT

Aluminum Clad is used with FrameSaver® products, which were designed to resist rot and decay by using a composite block at the bottom - the most susceptible area of the frame.

# Installation is a Quick and Easy Process

REEB®

The door unit is secured in the rough opening, then the cladding is simply snapped into place over the jambs and brickmould concealing the installation holes and providing a clean appearance. Finally, premium grade caulk is applied at the seams to seal the unit from the elements.

## Available Color Options

We strive to make the colors shown as accurate as possible. However, due to the printing process, the colors shown are approximate. Actual colors may vary from pictures shown.

Aluminum Clad is available in the following colors, trade-matched to both Reeb® Finish Paint, as well as Larson® Storm Doors.

Bright White
